

WILD Programme — Telegram Community Briefing

To: Telegram Community Manager **Re:** Full project handover — what's built, what you're running, what's next

What's Been Built

Over the past weeks we've built a complete launch-ready business around Wake-Induced Lucid Dreaming (WILD). Here's what exists:

Landing Pages (6 HTML files, ready to host)

- `landing_page.html` — lead magnet capture page, email gates the free PDF download
- `thankyou.html` — post-signup page, delivers the PDF, upsells all tiers
- `tier1.html` — Foundation course, £50
- `tier2.html` — Advanced Practitioner, £100
- `tier3.html` — Master Programme, £200 (includes 3 months free community)
- `community.html` — community membership sales page

Lead Magnet

- 16-page PDF: *7-Night WILD Protocol* — the free entry point that drives email list growth

Content Calendar

- 91 days of fully written, ready-to-post content across both funnels
- Biohacker stream (☉) and Spiritual stream (♠) — every day has both versions
- Every day includes: X/Twitter post, Instagram caption, TikTok script, media brief, CTA
- Organised as 13 weekly files in the *Ready to Post Content Calendar* folder

Strategy Documents (Markdown, Google Docs ready)

- Phase One Marketing Funnel
- Community Strategy
- Server Layouts (channel architecture)
- Platform Comparison
- App Plan (PWA companion app — planning stage only)
- Funnel Gap Analysis

Spreadsheets (CSV, Google Sheets ready)

- Command Centre (KPI dashboard, revenue projection, CRM, email sequences, analytics)
 - 3-Month Calendar
 - Course Calendar
 - Email Strategy
-

Your Role: Telegram Biohacker Stream

You are running the **Telegram community** — the **biohacker and science-focused stream**.

Platform: Telegram **Price:** £15/month per member **Audience:** Data-driven, science-oriented WILD practitioners

Your 7 channels to set up:

1. `sleep-data-lab` — members share tracking sheets, get peer review on their WBTB window

2. **protocol-critique** — post your WBTB stack for community critique and optimisation
3. **hardware-reviews** — Drem 2, Muse S, Aurora — honest reviews and configuration
4. **supplements-stack** — galantamine cycles, alpha-GPC timing, harm reduction, evidence-first
5. **wins-and-data** — log lucid dreams with date, method, duration, technique
6. **research-drops** — new sleep science papers, summarised weekly
7. **accountability-pods** — matched 4-person groups for weekly check-ins

Weekly schedule to run:

- Monday: Weekly challenge launch + data submission open
- Tuesday: Research paper drop + protocol critique thread
- Wednesday: Mid-week data check + hardware spotlight
- Thursday: Live Q&A session + guest practitioner
- Friday: Week-in-review stats + community wins log
- Saturday: WBTB group night + deep-dive article
- Sunday: Accountability pod check-ins due + next week planning

Member progression system:

- Dreamer (entry) → Practitioner (7 days logged data) → Lucid (first verified WILD) → Master (10+ WILDs, 90+ days)

Important: The Discord community (run separately) handles the spiritual/consciousness stream. The two platforms are deliberately different cultures — don't duplicate content between them. Cross-platform content drops go to bundle members only.

Revenue Projections

Milestone	Timeline	Monthly Revenue
Launch target	Month 1	£1,000/mo
Consistent execution	Month 3–4	£5,000/mo
Scale phase	Month 8–9	£20,000/mo
Compounding community	Month 12+	£100,000/mo
Full penetration	Long-term	£5M+ courses + £6–18M/yr MRR

Community revenue model (Telegram side at £15/mo):

- 100 members = £1,500/mo
- 500 members = £7,500/mo
- 1,000 members = £15,000/mo
- 5,000 members = £75,000/mo

Course revenue splits (of each sale):

- Tier 1 (£50) — 60% of course buyers
- Tier 2 (£100) — 30% of course buyers
- Tier 3 (£200) — 10% of course buyers (includes 3 months free community)

Overall email-to-course conversion rate target: 8%. Course-to-community: 60%.

What's Still Needed Before Launch

Your setup tasks (Telegram side):

1. Create Telegram group/channel structure (7 channels above)
2. Create a Whop account → set up £15/mo Telegram product → connect to Telegram group
3. Share the Whop product link with us to replace the placeholder in `community.html`
4. Set up the weekly schedule rhythm above from Day 1

Shared setup tasks (handled on our end):

1. Create Payhip account → add 3 course products (£50/£100/£200) → share links to update tier pages
2. Create Kit account (kit.com) → set up email form → automate PDF delivery → update `landing_page.html`
3. Upload PDF to Google Drive → get shareable link → update `thankyou.html`
4. Host all 6 HTML files on GitHub Pages
5. Set up Discord server (7 consciousness channels — handled separately)

Ongoing content tasks (already done):

- All 91 days of content is written and waiting in the *Ready to Post Content Calendar* folder
- Day 1 is ready to post now — no waiting required
- Post daily across X, Instagram, and TikTok following the calendar

Key Numbers to Know

- **Free lead magnet:** 7-Night WILD Protocol PDF — the funnel entry point
- **Your community price:** £15/month
- **Bundle price (both platforms):** £30/month
- **Tier 3 free community:** 3 months free, then £24/mo (20% loyalty discount)
- **30-day money-back guarantee** on all community plans

Files You Need

Everything is in the *WILD Bizz* folder:

- `/01 - Strategy/` — all planning docs
- `/02 - Landing Pages/` — all 6 HTML pages
- `/03 - Content Calendars/` — full 91-day calendar source
- `/04 - Spreadsheets/` — CSVs, import to Google Sheets
- `/05 - Lead Magnet/` — the PDF

Ready to Post Content Calendar is a separate folder on the Desktop with 13 weekly files (Week_01 through Week_13), one per week, all formatted and ready to copy-paste.

Any questions — reply to this email or message directly. The technical setup should take under 2 hours once accounts are created.
